Capabilities

Magnum Machining is always up for new challenges and has the capabilities to accomplish these challenges with precision and punctuality. Magnum has state-of-the-art equipment and unmatched technical expertise. We have a dedicated staff that strives for total customer satisfaction for each and every job.

Our processes have been developed to ensure a seamless transition throughout each phase. From design to delivery, we have the ability to exceed customer expectations.

With the capabilities of Master CAD/CAM system and a ISO Certified Quality System we can manage the design as well as engineer, manufacture and assemble precision components for a wide variety of diverse markets. We are also able to meet the unique specifications and delivery requirements of our customers. We have a competitive cost structure that initially attracts many customers but our customers STAY because of our unparalleled service and attention to their needs.

Magnum has the ability to design and manufacture custom tooling and featuring on site. This has proven to offer infinite operational process possibilities. This feature aids in our goal of exceeding our customer's expectations and their overall satisfaction. Magnum Machining is committed to continually placing itself on the competitive edge of precision manufacturing.

With ISO Certification and gauge traceability to NIST. Our customers can be assured that all documentation will be in order and continuous improvements will be at the top of all management reviews. The Quality Department has capable equipment that provides customers with the required data that includes: PPAP, APQP, 1st Article Reports, In-Process Inspection Data, Final Inspection Reports and SPC requirements as specified. It also assures internal adherence to our quality manual as well as our stringent quality goals.

Magnum Machining takes great care in respecting all of our current and potential customer's confidentiality and proprietary concerns.
