## Capabilities - Mexico

Maquinaria Magnum is always ready for new challenges and has the capabilities to accomplish these challenges with precision and punctuality. Maquinaria Magnum has the state-of-the-art equipment and unmatched technical expertise. Our staff is dedicated to provide total customer satisfaction for each and every job.

Our processes have been developed to ensure a seamless transition throughout each phase. From design to delivery, we have the ability to exceed customer expectations. We have the capability to machine various types of material, such as Ductile Iron, Grey Iron, Bronze, Aluminum, and all forms of Steel. With the capabilities of Master CAM/CAD systems and a Quality System that is ISO Certified, we can manage the design, engineering, manufacturing, and assembly of precision components for a wide variety of diverse markets. We are able to change product lines quickly by using standardized tooling and fixturing; thus benefiting the customer with their ever changing requirements.

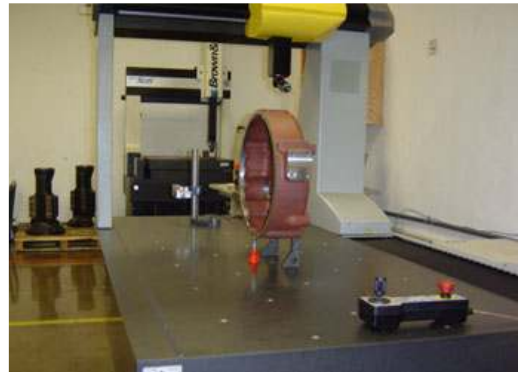

[Español](#)

Magnum has the ability to design and manufacture custom tooling on site. This has proven to offer infinite operational process possibilities. This feature aids in our goal of exceeding our customer's expectations and their overall satisfaction.

Being able to meet the unique specifications and delivery requirements of our customers is crucial in today's marketplace. With our strategic location, we can provide several methods of transportation for exporting and importing product, whether by truck, rail, air and or seaports. We are able to offer importation of machined products from over sea's, this can offer customers overall cost reduction. We have a competitive cost structure that initially attracts many customers but our customers STAY because of our unparalleled service and attention to their needs.

Maquinaria Magnum takes great care in respecting all of our current and potential customer's confidentiality and proprietary concerns
